

Md. Al-Shahreyar

Senior Software Engineer · AI-Driven Architect · WordPress Expert

Mirpur 12, Dhaka, Bangladesh · +8801746894046 · shahreyar.shimul15@gmail.com · LinkedIn · GitHub · WordPress.org

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years architecting high-impact WordPress plugins and SaaS-style products serving **50,000+ active installs** globally. Currently Architect & Planner at WPPOOL, working at the intersection of traditional CMS engineering and AI-assisted development. Expert in PHP (OOP), React, Vue.js and database optimisation — with a strong focus on clean code, automated testing, QA automation and AI-powered developer workflows that measurably accelerate delivery.

CORE STRENGTHS

- AI-assisted development using Claude, Cursor, ChatGPT, Antigravity, Lovable, Qwen, GitHub Copilot
- Clean, testable, OOP architecture · WordPress Coding Standards · code reviews
- QA automation · unit & integration test design · regression coverage
- Plugin & SaaS architecture · WooCommerce extensions · REST API design
- Database optimisation · large-scale order/data archival · query profiling
- Third-party API integrations: Jitsi, Zoom, Google, WhatsApp Business, SMTP

WORK EXPERIENCE

Senior Software Engineer · Architect & Planner — WPPOOL

Jun 2022 — Present

- Lead architecture & planning for flagship WordPress products serving **50,000+ active installs** across multiple plugins.
- Contributed to **WP Dark Mode** (20,000+ active installs) — shipped **AI-Powered Dark Theme generation** for intelligent palette switching.
- Architected **ArchiveMaster**: WooCommerce DB optimiser with one-click local & Amazon RDS order archiving — reduced wp_posts bloat and improved query times for high-volume stores.
- Engineered **FlexMeeting** on Jitsi Meet API — native webinar/video conferencing inside WordPress with WooCommerce, LMS and BuddyPress integrations.
- Built **EchoRewards** referral & loyalty engine — automated unique coupon generation, social sharing (WhatsApp/X/Facebook) and ROI analytics dashboard, designed to **lower customer acquisition cost**.
- Pioneered AI-assisted development workflows (Claude, Cursor, ChatGPT, Antigravity, Lovable) that **measurably improved team velocity**.
- Drove QA automation and clean-code culture through code reviews, test coverage and OOP refactors.

Stack: PHP (OOP) · React · Vue.js · WP REST API · WooCommerce · MySQL · Jitsi · AI Tooling

Software Engineer — WPCommerz

Dec 2021 — Jun 2022

- Developed and maintained production WordPress plugins, themes, WooCommerce add-ons and Elementor extensions.
- Built reusable OOP base classes adopted across the team's plugin suite.
- Implemented SMTP-based transactional email layer and integrated multiple third-party APIs.

Stack: PHP · WooCommerce · Elementor · JavaScript · MySQL

Software Engineer — ChiliDevs

Feb 2021 — Nov 2021

- Built object-oriented PHP plugins for WordPress and WooCommerce serving international clients.
- Shipped new features for existing client plugins and provided technical debugging support.

Stack: PHP (OOP) · WooCommerce · jQuery

Frontend Developer — Preneur Lab Limited

Sep 2020 — Dec 2020

- Created responsive templates and converted designs into custom WordPress themes for e-commerce clients.

Stack: HTML5 · CSS3 · JavaScript · WordPress

Backend Developer — Lumans Lab

Jan 2020 — May 2020

- Developed Laravel backend modules, designed database schemas, and shipped performance improvements.

Stack: Laravel · PHP · MySQL

SELECTED PRODUCTS & PROJECTS

WP Dark Mode — 20,000+ active installs. Shipped AI-Powered Dark Theme generation, OS-level preference detection and cross-browser UI consistency.

ArchiveMaster — WooCommerce DB Optimizer — Architect. Local + Amazon RDS order archiving, multi-format export (CSV/JSON/XML/PDF), smart Order ID conflict handling for zero-data-loss restoration.

FlexMeeting — Jitsi Integration — Native WP webinars & video conferencing with deep WooCommerce, LMS and BuddyPress integration.

EchoRewards — Referral & Loyalty — Customer-to-customer referral engine; automated coupon generation, social-sharing links and analytics dashboard for ROI tracking.

FormyChat — Social Contact Form — Connects CF7, WPForms and Gravity Forms to WhatsApp & WhatsApp Business with floating chat widget and multi-agent support.

TECHNICAL ARSENAL

Languages	PHP (OOP) · JavaScript (ES6+) · TypeScript · SQL · HTML5 · CSS3
Frameworks	React.js · Vue.js · Laravel · Tailwind CSS · jQuery
WP Ecosystem	Plugin Architecture · WooCommerce · Gutenberg · Elementor · WP REST API · SVN/Git
AI Tooling	Claude · Cursor · ChatGPT · Antigravity · Lovable · Qwen · GitHub Copilot
QA & Testing	Unit testing · Integration tests · QA automation · Code review · WordPress Coding Standards
Architecture	SaaS planning · API design · Database optimisation · Caching · Performance profiling

EDUCATION

Daffodil International University — B.Eng in Software Engineering, Faculty of Information Technology · CGPA 3.21 · 2015 — 2019
